POWERGISTICS Charging and
Storage **TOWERS** help educators
get their classrooms **SAFE** and
READY for their students to return.

Our 100% Student Managed Deployment
inhibits the spread of germs in the classroom.
Individual storage trays reduce touching and
cross-contamination, so there's never been
a safer way to store, charge and deploy your
classroom devices.

Our latest device storage and charging Towers
are available with an antimicrobial coating and
optional cleaning-wipe caddy to further help
protect your teachers and students.

PowerGistics

 **chrome enterprise Partner**

The 100% Student Managed nature of our Towers helps prevent the spread of germs:

- **Single Touch Device Deployment for Students**

With a dedicated shelf for every student, they only touch the power cable when retrieving and returning their device during the school day. There is no need to touch the charging Tower.

- **No Touch Device Deployment for Teachers**

Since the teacher can visually inventory the devices because of the open door concept, their only role is to lock and unlock PowerGistics Towers by touching the key or lock.

- **No Traffic-Jam Deployment**

If the class is larger, placing two Towers on opposite sides of the room creates natural social distance and speeds up deployment time. Students can retrieve their device by color group, allowing small groups of 2-5 to collect their device easily.

- **USB Tower Series Includes the USB-C Cables**

Save the power bricks that come with your devices to send home with students in case of school closures. Wire our Towers once and enjoy maintenance free cable management for your full device life cycle – or longer.

- **Optional Cleaning Caddy Accessory**

This add-on accessory hangs on the side of the Tower and easily fits a standard sanitizing wipes container, or a large hand sanitizer pump.

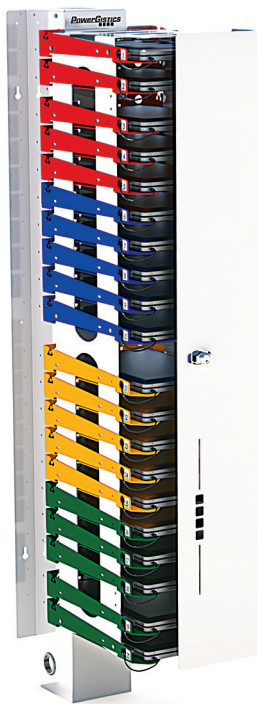

- **Open Tower Design allows Natural Air Flow**

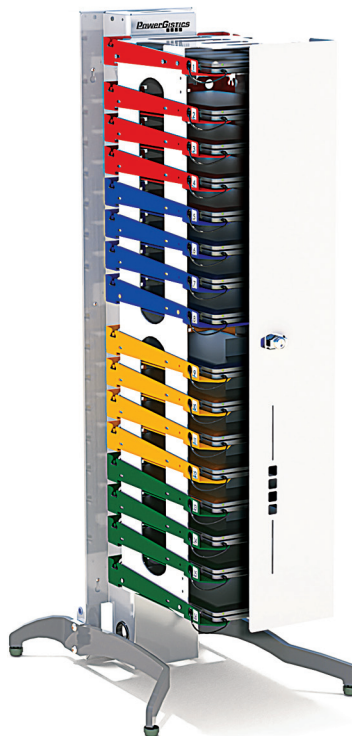

With increased ventilation, microorganisms are not trapped in the Towers, helping to minimize colony growth and disperse germs.

- **Antimicrobial Powder Coating Available**

The silver-ion additive to the powder coat finish kills or slows the growth of microorganisms, including bacteria, viruses, mold and mildew. While it cannot guarantee to kill all microorganisms, it's designed to interrupt their growth and spread.* Antimicrobial Custom School Spirit colors are available in Red, Blue, Yellow, Green and White (the shades on our standard Towers).

Wall Mounted

Just-A-Stand

Rolling Stand

*Antimicrobial coating available as an option with all Towers. Cleaning Caddy sold as an accessory.
