# 4TH QUARTER SPECIAL

## Antimicrobial Paint

# \$49.99 Per Tower

Special Offer expires 12/31/20  
(Standard Price is \$199/Tower)

The antimicrobial powder coated paint uses a silver-ion additive that kills and disrupts the growth of microorganisms, including bacteria, viruses, and fungi. Silver-ion technology works by destroying the cell wall in microorganisms that come in contact with it, while remaining entirely safe for humans.

While the antimicrobial paint cannot guarantee to kill all germs and does not negate the need for disinfecting devices, it does offer an **extra layer of protection against spreading common germs.**

### Safety

PowerGistics Towers can help ensure that all students have access to a fully charged device for 1:1 deployment, keeping them connected and safer from the spread of germs.

- Student managed single touch deployment
- Social distance deployment without losing teaching time

### Versatility

- Matches today's and tomorrow's ever-changing device deployment needs
- Available in 8, 12, 16 and 20 shelves with versatile mounting options.

Antimicrobial paint available as an option with all Towers.
