

# THE **SMARTER** ALTERNATIVE TO THE CHARGING CART.

Wall Mounted

Rolling Stand

Just-A-Stand

**PowerGistics Towers are the perfect charging solution for Chromebooks, iPads and tablets in a classroom environment.**

**POWERGISTICS** Towers save teachers time by eliminating traffic jams, empowering students to care for their own devices, and preventing accidentally unplugged devices. Teachers can rest assured that devices are properly returned with only a glance - even when the door is locked. The horizontal shelf design and patented cable management also greatly reduce repair and maintenance costs from cord damage, stolen cables, drops, and device spine damage.

***POWERGISTICS Towers save school districts time and money while teaching students the importance of responsibility.***

## **Two towers are better than one!**

Place multiple Towers in a classroom to prevent bottlenecks and save time in deployment.

Our storage and charging solutions range from desk-top Towers that hold and charge up to six devices, to units that can store and charge as many as 20 devices.

We also have deployment specialists ready to work with you on the best solution for your classroom's layout and number of devices.

# Key Features for Academic Results

## 1. TechStop:

Allows you to adjust the depth of the shelves, so any devices you choose sit at the front of the shelf, making return and retrieval quick and easy.

## 2. Maintenance Free Cable Management:

Allows students of all ages and abilities to manage all deployment activities.

## 3. Small Footprint:

Two of our Towers take up less than half of the square footage of a single cart and look good doing it.

## 4. Antimicrobial:

The Core Towers come standard with an antimicrobial paint coating, giving extra protection against spreading common germs.

## 5. Standard Power

Accommodates the power needs of any device, even the most robust laptops, with a fast charge of 2-3 hours.

— OR —

**USB Cables:** **USB-A** to **USB-C** cables included for fast and easy setup. Go from box to deployment in ten minutes.

## 6. Open Concept Door:

Teachers can see if devices are put away and plugged in from anywhere in the classroom.

## 7. Wireless Updating:

The open design allows for obstruction free updating of devices.

## 8. One Tower, Three Options:

Wall mount, Stands or Rollers\* are designed specifically to evolve to your future deployment needs.

## 9. Colorful Shelves:

The four color shelves allow for organized deployment options for team learning. Custom colors are also available to show school spirit.

## 10. Plastic Free Aluminum Construction:

Lightweight powder coated aircraft grade aluminum construction provides a natural heat sink that increases device longevity.
